

AUSGEWÄHLTE FORSCHUNGSERGEBNISSE SELECTED RESEARCH REPORTS

Chemistry and Physics of Filled Skutterudites	31	Tuning the Electronic Properties of Metal Rich-Borides	113
Correlation Effects in the Semimetal FeSb ₂ : From Bulk Properties to Spectroscopy	37	Complex Metallic Alloys	119
Crystal Chemistry and Physical Properties of the Non-Magnetic Kondo-Compound HfAs _{1.7} Se _{0.2}	41	The Nature of Laves Phases	126
Magnetic, Structural, and Superconducting Properties of the Layered AFe ₂ As ₂ Series of Compounds	49	Intermetallic Clathrates Revisited	134
CeTPO Compounds: Quasi Two-dimensional Kondo Lattices with Ferromagnetic Correlations	56	New Silicon and Germanium Frameworks by High-Pressure Synthesis	140
Electron Spin Resonance of Ferromagnetic Kondo Lattice Systems	61	Magnetotransport in Heavy Fermion Metals CeMIn ₅ (M = Co, Ir)	144
Theoretical Aspects of Electron Localizability	65	Origin of the Smeared Ferromagnetic Quantum Phase Transition in CePd _{1-x} Rh _x : Evidence of a Kondo-Cluster-Glass State	148
New Structural Elements in Ternary Carbides	71	Low-Valency Nitridocobaltates of Alkaline-Earth Elements and Related Compounds	153
Concerning Carbo Compounds: On the Nature of C ₂ Units	77	Pd-Ga Intermetallic Compounds – A New Approach to Heterogeneous Hydrogenation Catalysts	159
Sr ₂ Ni ₃ – A Strontium Subnickelide?	83	Magnetic-Field Induced Crossover of Superconducting Percolation Regimes in the Layered Organic Mott System κ-(ET) ₂ Cu[N(CN) ₂]Cl	163
Shift of Paradigms in Understanding of Intermetallic Compounds by Analysis of Chemical Bonding within the Electron Localizability Approach	88	Quadrupole Coupling – the Key to NMR Spectroscopy of Intermetallic Compounds	167
Abrupt Fermi-Surface Change at the Quantum Critical Point in YbRh ₂ Si ₂	95	New Optical Devices for Major Advances in X-ray Diffraction	171
Detaching the Antiferromagnetic Quantum Critical Point from the Fermi Surface Reconstruction in YbRh ₂ Si ₂	99	Towards Rare Earth (RE) Thio- and Selenoborates	175
Paramagnon-mediated Superconductivity in CeCu ₂ Si ₂	104	Nanometer-scale Phase Separation in Manganites	179
Vortex Avalanches in the Non-centrosymmetric Superconductor Li ₂ Pt ₃ B	108	Chemical Transport and Electronic Properties of Europium Compounds with Complex Anions	183

Competing Interactions in Low-Dimensional Spin 1/2 Systems	187	Feedback Resonances in Unconventional Superconductors and Kondo Semiconductors	207
Frustrated Magnetism in Vanadium Oxides	193	Apatite-Gelatine-Nanocomposite-Superstructures: New Insights into a Biomimetic System of High Complexity	212
From Ions in Solution to Nanocrystals and Composite Materials: Insights from Atomistic Simulations	199	Biomimetic Morphogenesis and Structure of Calcite Statoliths (Otoconia): An Approach towards Deeper Understanding of a Bio-Sensor and its Function	218
Advancements in the Understanding of Pressure and Temperature Induced Phase Transitions in Solids	203
